

TCI™ EXECUTIVE SELF-ASSESSMENT

21 Questions Every Leader Should Ask

A 15-minute diagnostic to test the evidence behind your transformation confidence.

HOW TO USE THE ASSESSMENT

Turn confidence into a disciplined executive conversation.

Complete the assessment individually before discussing it as a leadership team. Score the current strength of evidence, not the quality of the ambition or the effort invested.

- 01** Score independently
Rate each question from 1 to 5. Use the evidence available today.

- 02** Compare the gaps
Discuss questions where leadership scores differ by two points or more.

- 03** Test the narrative
Check whether status reporting reflects the evidence behind the scores.

- 04** Agree three actions
Name the evidence, decision or intervention needed next, with an owner and date.

SCORING SCALE

1	Weak or absent	No reliable evidence, ownership or repeatable practice.
2	Emerging	Some intent or isolated evidence, with material gaps.
3	Mixed	Evidence exists, but quality or consistency varies.
4	Strong	Clear evidence, ownership and regular leadership use.
5	Strong and repeatable	Trusted evidence shapes decisions and holds across the organisation.

DIMENSION 01

Strategic clarity

Do leaders share a precise view of the outcome, choices and ownership?

Score each statement from 1 to 5. Circle one score per question.

01	The transformation outcomes are explicit, measurable and tied to enterprise strategy.					
	Weak / absent	1	2	3	4	5

02	Leaders agree what will change for customers, colleagues, operations or financial performance.					
	Weak / absent	1	2	3	4	5

03	The organisation has made clear choices about what sits outside the transformation scope.					
	Weak / absent	1	2	3	4	5

04	Accountability for each strategic outcome sits with a named executive owner.					
	Weak / absent	1	2	3	4	5

DIMENSION SCORE	___ / 20
Evidence or issue to discuss	

DIMENSION 02

Value realisation

Is business value visible in evidence, ownership and decisions?

Score each statement from 1 to 5. Circle one score per question.

05	Each material benefit has a baseline, measure, target date and accountable business owner.					
	Weak / absent	1	2	3	4	5
06	Leaders see early evidence of value, not only forecasts or programme activity.					
	Weak / absent	1	2	3	4	5
07	Benefits remain credible after allowing for delivery cost, operating cost and disbenefits.					
	Weak / absent	1	2	3	4	5
08	Investment decisions change when value evidence strengthens or weakens.					
	Weak / absent	1	2	3	4	5
09	The transformation measures outcomes across customer, colleague, operational, risk and financial value where relevant.					
	Weak / absent	1	2	3	4	5
DIMENSION SCORE		___ / 25				
Evidence or issue to discuss						

DIMENSION 03

Delivery confidence

Is there a credible route from today's position to the intended outcome?

Score each statement from 1 to 5. Circle one score per question.

10	The delivery plan reflects the most important cross-business and technology dependencies.					
	Weak / absent	1	2	3	4	5

11	Leaders understand the assumptions most likely to change cost, time, risk or value.					
	Weak / absent	1	2	3	4	5

12	Decision cycles are fast enough to resolve issues before they become outcome risks.					
	Weak / absent	1	2	3	4	5

13	Delivery evidence supports the reported level of confidence, including where status is green.					
	Weak / absent	1	2	3	4	5

DIMENSION SCORE	___ / 20
Evidence or issue to discuss	

DIMENSION 04

Adoption and capability

Are behaviour, capability and the operating model changing with the technology?

Score each statement from 1 to 5. Circle one score per question.

14	The target operating model is clear enough for teams to understand future roles and decisions.					
	Weak / absent	1	2	3	4	5

15	Adoption measures track changed behaviour and business usage, not only training or communication.					
	Weak / absent	1	2	3	4	5

16	Critical skills and leadership capability are in place for both delivery and the future state.					
	Weak / absent	1	2	3	4	5

17	Incentives, performance measures and local priorities support the intended transformation outcome.					
	Weak / absent	1	2	3	4	5

DIMENSION SCORE

___ / 20

Evidence or issue to discuss

DIMENSION 05

Sustainability and governance

Will value, controls and ownership hold after the programme phase ends?

Score each statement from 1 to 5. Circle one score per question.

18	Long-term ownership, funding and support are defined before transition from the programme.				
	Weak / absent	1	2	3	4
19	Risk, control, resilience and regulatory requirements are built into the target state.				
	Weak / absent	1	2	3	4
20	The organisation has a credible plan to retire legacy processes, platforms and cost.				
	Weak / absent	1	2	3	4
21	Governance keeps value, technical health and organisational adoption visible after go-live.				
	Weak / absent	1	2	3	4

DIMENSION SCORE	___ / 20
Evidence or issue to discuss	

YOUR CONFIDENCE PROFILE

Read the pattern, not only the total.

Your overall score is a useful signal. The weakest dimension and the widest leadership score gaps often matter more.

01 Strategic clarity	—	20
02 Value realisation	—	25
03 Delivery confidence	—	20
04 Adoption and capability	—	20
05 Sustainability and governance	—	20
TOTAL CONFIDENCE SCORE	—	105

INDICATIVE CONFIDENCE BANDS

87-105	High confidence	Evidence is broadly strong. Test the weaker dimensions and guard against optimism bias.
67-86	Conditional confidence	The outcome looks credible, but material evidence gaps or dependencies remain.
47-66	Fragile confidence	The transformation story is ahead of the evidence. Leadership intervention is needed.
21-46	Low confidence	Core outcomes, value or delivery assumptions need urgent re-examination.

LEADERSHIP DISCUSSION

Convert insight into three commitments.

Discuss the questions where evidence is weakest or leadership views differ most. Agree three actions which will improve the quality of evidence or the transformation response.

THREE QUESTIONS FOR THE NEXT REVIEW

1. _____
2. _____
3. _____

A NOTE ON INTERPRETATION

TCI™ is a leadership diagnostic, not a formal audit, assurance opinion or external benchmark. Use the score to improve the quality of discussion and decisions. Revisit the assessment when evidence or conditions change.
